PORTFOLIO RISK FACTORS

AI-generated risk factor analysis based on the active snapshot.

- Termination Risk: 3 offices breach the 200% HUD compare-ratio threshold with >100 loans.
- Wholesale channel runs DPA concentration much higher than retail - primary CR driver.
- DPA loans delinquent at ~2.4x the rate of Standard FHA.
- Boost program removals reduce 6 of 8 termination-risk offices below 200%.
- LTV >95% bucket carries the highest delinquency rate.
- Honolulu and Buffalo register extreme CRs on small samples.
- Manual underwriting contributes disproportionately to seriously-delinquent loans.
- HUD field offices retain authority to suspend underwriting at >200%.

HUD Enforcement: Each HUD field office can independently suspend lender underwriting authority when the compare ratio exceeds 200%.

PROJECTED DROP-OFF - Loans Aging Out of HUD 24-Month Window

Projected loans falling off the HUD compare-ratio window (24-month FPD amortization) at 1, 3, and 6 months. Base scenario. National view.

Horizon	Current Loans in Window	Projected Drop-Offs	Projected Loans in Window (after)	Projected CR (base scenario)	Status
1 month	9,486	0	9,486	100%	Safe
3 months	—	776	8,710	100%	Safe
6 months	—	1,952	7,534	100%	Safe

Note: "Current Loans in Window" is today's window snapshot - identical across horizons; shown once on the top row.
